aircraft design a conceptual pdf
The aircraft design process is the engineering design process by which aircraft are designed. These depend on many factors such as customer and manufacturer demand, safety protocols, physical and economic constraints etc. For some types of aircraft the design process is regulated by national airworthiness authorities.

The Northrop-Loral F-19A Specter is a next-generation, high-speed fighter-interceptor using advanced stealth technology. Begun during the XST design shootout in the late 1970s, the Specter grew from the same seed as the F-117 stealth fighter, but diverged as Northrop developed higher performance technologies.
