InformationWeek, serving the information needs of the

Event-driven architecture (EDA), is a software architecture pattern promoting the production, detection, consumption of, and reaction to events.. An event can be defined as "a significant change in state". For example, when a consumer purchases a car, the car's state changes from "for sale" to "sold". A car dealer's system architecture may treat this state change as an event whose occurrence ...

What industry experts are saying about Demand Driven Material Requirements Planning (DDMRP)... With the development of DDMRP and now the writing of this book, Ptak and Smith have broken through common practice to bring common sense to supply chain management.

Demand Driven Material Requirements Planning (DDMRP)

Cloud computing is shared pools of configurable computer system resources and higher-level services that can be rapidly provisioned with minimal management effort, often over the Internet. Cloud computing relies on sharing of resources to achieve coherence and economies of scale, similar to a public utility.. Third-party clouds enable organizations to focus on their core businesses instead of ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
