Introduction: The measurement of insulation resistance is a common routine test performed on all types of electrical wires and cables. As a production test, this test is often used as a customer acceptance test, with minimum insulation resistance per unit length often specified by the customer. The results obtained from IR Test are not intended!

Quote HSE " Success in managing major Hazards is not measured by the Occupational Health and Safety Statistics but by measuring the performance of critical systems used to control risks to ensure they are operating as intended.. This statement is a very powerful statement and i want to stand on the premise that it should form the basis of assessing and formulating regulation regimes.
