GNU Manuals Online. This table lists official GNU packages with links to their primary documentation, where available. When a package has several associated manuals, they are all listed. If a package has no specific manual online, the link just goes to the package's home page (which is also linked to explicitly).

Buffer overflow protection is any of various techniques used during software development to enhance the security of executable programs by detecting buffer overflows on stack-allocated variables, and preventing them from causing program misbehavior or from becoming serious security vulnerabilities. A stack buffer overflow occurs when a program writes to a memory address on the program's call ...

DOCK. RETURN TO TABLE OF CONTENTS. 2.1. Overview. This section is intended as a reference manual for the features of the DOCK Suite of Programs. It is intended to give an overview of the ideas which form the basis of the DOCK suite of programs and to detail the available user parameters.

DOCK 6.9 User Manual

Handbuilding . Hand-building is often the best place to start your clay experience. Hand building explores many popular methods of clay forming including slab building, pinch pots, and building with coils.

At Georgies: Portland Wheelthrowing & Handbuilding Classes

In the C and C++ programming languages, `#pragma once` is a non-standard but widely supported preprocessor directive designed to cause the current source file to be included only once in a single compilation. Thus, `#pragma once` serves the same purpose as include guards, but with several advantages, including: less code, avoidance of name clashes, and sometimes improvement in compilation speed.
