Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the (engineering and) design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

Human factors and ergonomics - Wikipedia

The Handbook for Civil Aviation Medical Examiners (CAMEs) is a guidance material for CAMEs who perform periodic medical examinations on aviation personnel (pilots and air traffic controllers).

TP 13312 - Handbook for Civil Aviation Medical Examiners

Flight categories in the U.S. METARs can be expressed concisely using so-called aviation flight categories, which indicates what classes of flight can operate at each airport by referring to the visibility and ceiling in each METAR. Four categories are used in the U.S.:
