An attenuator is an electronic device that reduces the power of a signal without appreciably distorting its waveform.. An attenuator is effectively the opposite of an amplifier, though the two work by different methods.While an amplifier provides gain, an attenuator provides loss, or gain less than 1.

A crystal radio receiver, also called a crystal set, is a simple radio receiver, popular in the early days of radio.It uses only the power of the received radio signal to produce sound, needing no external power. It is named for its most important component, a crystal detector, originally made from a piece of crystalline mineral such as galena. This component is now called a
