

holt earth science plate pdf

Earth is the third planet from the Sun and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth revolves around the Sun in 365.26 days, a period known as an Earth year.

Earth - Wikipedia

An earthquake (also quake or tremor) is the shaking of the surface of the Earth. Earthquakes can be extremely violent. They are caused by sudden movements of the Earth's tectonic plates.. The study of earthquakes is called seismology. Earthquakes are usually quite brief, but may repeat.

Earthquake - Simple English Wikipedia, the free encyclopedia

Physical characteristics. Mars is approximately half the diameter of Earth with a surface area only slightly less than the total area of Earth's dry land. Mars is less dense than Earth, having about 15% of Earth's volume and 11% of Earth's mass, resulting in about 38% of Earth's surface gravity. The red-orange appearance of the Martian surface is caused by iron(III) oxide, or rust.
