International Journal of Control, Automation and Systems is a joint publication of the Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE).. The journal covers three closely-related research areas including control, automation, and systems.

Control theory in control systems engineering is a subfield of mathematics that deals with the control of continuously operating dynamical systems in engineered processes and machines. The objective is to develop a control model for controlling such systems using a control action in an optimum manner without delay or overshoot and ensuring control stability.

A control system manages, commands, directs, or regulates the behavior of other devices or systems using control loops. It can range from a single home heating controller using a thermostat controlling a domestic boiler to large industrial control systems which are used for controlling processes or machines.. For continuously modulated control, a feedback controller is used to automatically ...

Teesside University's MEng (Hons) Instrumentation and Control Engineering degree will set you firmly on the path for high-earning potential as a professional engineer. You learn the intricacies of electronics, networks and linear control to create instrumentation and control engineering systems which have a range of

applications.
