Cranes and MEWPs (Mobile Elevating Work Platforms) are predominantly used for the erection of structural steelwork for buildings and bridges in the UK, although other techniques are sometimes used for steel bridge construction. Generally, cranes may be divided into two broad categories, mobile and non-mobile. The first

category includes truck mounted cranes, crawler cranes and all-terrain ...

Construction - Steelconstruction.info

The Specification provides the generally applicable requirements for the design and construction of structural steel buildings and other structures. The 2016 edition of the AISC Specification and Commentary supersedes and is an update of the 2010 edition. Both LRFD and ASD methods of design are incorporated. Dual-units format provides for both U.S. customary and S.I. units.

Current Standards | American Institute of Steel Construction

Lugged steel frame construction is a method of building bicycle frames using steel tubing mated with socket-like sleeves, called lugs. For most of the bicycle's history, steel has been the primary material for bicycle frames, with lugged construction the primary assembling method. Steel continues in use by builders of high-quality steel frames, though its dominance as a frame material has waned ...
