Welcome! Random is a website devoted to probability, mathematical statistics, and stochastic processes, and is intended for teachers and students of these subjects. The site consists of an integrated set of components that includes expository text, interactive web apps, data sets, biographical sketches, and an object library.

### **Random: Probability, Mathematical Statistics, Stochastic**

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

I am currently working to develop a data science program in University of Nebraska at Omaha and teaching introduction to data science. While talking to the business community around Omaha, we got a nice feedback and everyone indicated the necessity of such a program.

### **Data science: how is it different to statistics ? – IMS**

Structured data analysis is the statistical data analysis of structured data. This can arise either in the form of an a priori structure such as multiple-choice questionnaires or in situations with the need to search for structure that fits the given data, either exactly or approximately. This structure can then be used for making comparisons, predictions, manipulations etc.

Another problem faced when collecting data is that some data may be missing. For example, in conducting a survey with ten questions, perhaps some of the people who take the survey don't answer all ten questions. In Identifying Outliers and Missing Data we show how to identify missing data using ...
