1. Identify the problem. This step can be difficult as children do not always have the words to tell you how they feel or know exactly what the problem is. Finding a quiet space where your child feels comfortable and relaxed may help them to start talking about it. Using your active listening skills will also help your child to feel understood and supported in talking to you.

- Problem solving is vital in all aspects of business from people problems to technical problems and from short-term to long-term problems. And problem-solving involves two completely different, possibly conflicting thought processes: creativity and decision making. The first part, the creativity, is to generate options, possible solutions, and then the second part, the decision making is to ...

Problems and Problem Solving. What is a problem? In common language, a problem is an unpleasant situation, a difficulty. But in education the first definition in Webster's Dictionary "a question raised for inquiry, consideration, or solution" is a common meaning. More generally in education, it can be useful to define problem broadly "as any situation, in any area of life, where ...
