A product design specification (PDS) is a statement of how a design is made (specify the design), what it is intended to do, and how far it complies with the requirements. Requirements may be gathered in the Product Requirement Specification (PRS). Its aim is to ensure that the subsequent design and development of a product meets the needs (or requirements) of the user.

Product design specification - Wikipedia

In industry, product lifecycle management (PLM) is the process of managing the entire lifecycle of a product from inception, through engineering design and manufacture, to service and disposal of manufactured products. PLM integrates people, data, processes and business systems and provides a product information backbone for companies and their extended enterprise.
