vec introâ€” Introduction to vector error-correction models 3 If both y_t and x_t are covariance-stationary processes, e_t must also be covariance stationary. As long as $E[x_t e_t] = 0$, we can consistently estimate the parameters a and b by using OLS. Furthermore, the distribution of the OLS estimator converges to a normal distribution centered at the true value as ...

Meeting stringent phosphorus (P) discharge standards remains one of the major challenges for wastewater utilities due to increased economic burdens associated with advanced (i.e., secondary, tertiary) treatment processes.

Cost effectiveness of phosphorus removal processes in

Industry Classification. NAICS classifies each establishment into a detailed industry based on the production processes it uses. Under the SIC system, some establishments were classified according to production processes, but others were classified using different criteria, such as class of customer.
