A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...

Um roteador (router, em inglês) é um dispositivo que encaminha pacotes de dados entre redes de computadores, criando um conjunto de redes de sobreposição. Um roteador é conectado a duas ou mais linhas de dados de redes diferentes. Quando um pacote de dados chega, em uma das linhas, o roteador lê a informação de endereço no pacote para determinar o seu destino final.

A video game is an electronic game that involves interaction with a user interface to generate visual feedback on a two- or three-dimensional video display device such as a TV screen, virtual reality headset or computer monitor. Since the 1980s, video games have become an increasingly important part of the entertainment industry, and whether they are also a form of art is a matter of dispute.
