Passive RF and Microwave Integrated Circuits - 1st Edition

The growth in RF and wireless/mobile computing devices that operate at microwave frequencies has resulted in explosive demand for integrated circuits capable of operating at such frequencies in order to accomplish functions like frequency division, phase shifting, attenuation, and isolators and circulators for antennas.

RF and Microwave passive components bear a burden of many design constraints and performance metrics. Depending upon the power requirements of the application, the demands on the material and design performance can significantly increase.

High Power RF And Microwave Passive Considerations and

This work involves extensive research on existing RF and microwave circuit design techniques and the design, building and testing of RF passive devices such as filters, splitters and couplers.
