An intelligent DC-DC/AC converter system was designed and implemented in the Spring of 2010 for New Mexico Tech's Junior Design Class. The intelligent converter draws power from two energy harvesters; a 400W-12V Sunforce Wind Generator and a 60W-12V Sunforce Solar PV kit. The power is stored in an Optima 12V sealed lead acid battery.

Alternating current (AC) and direct current (DC) are notable for inspiring the name of an iconic metal band, but they also happen to sit right at the center of the modern world as we know it. AC and DC are different types of voltage or current used for the conduction and transmission of electrical energy.
