Science to support climate-smart agricultural development Concepts and results from the MICCA pilot projects in East Africa Mitigation of Climate Change in

Science to support climate-smart agricultural development

How can human activity affect Earth's climate? What ultimately determines climate, and specifically Earth's temperature? That question is at the heart of climate science and of the issues surrounding human-induced climate change and policies to prevent, ameliorate, or mitigate its effects. PART I. SCIENCE AND IMPACTS. FIGURE 1.2.

Understanding Climate Science - Stephen Schneider

to promote the use of science to benefit society and to inform critical policy debates, offer this new publication as a key reference document for decision makers, policy makers, educators, and other individuals seeking authoritative answers about the current state of climate-change science.

Climate Change Evidence & Causes - Division on Earth and

Landscape Conservation Cooperatives (LCCs) provide a new structure of science partnerships to develop decision-support tools to address climate change and other landscape-scale stressors (USFWS 2009).
