### **service oriented architecture ontology pdf**

Service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies. A service is a discrete unit of functionality that can be accessed remotely and acted upon ...

In software engineering, a resource-oriented architecture (ROA) is a style of software architecture and programming paradigm for supportive designing and developing software in the form of Internetworking of resources with "RESTful" interfaces. These resources are software components (discrete pieces of code and/or data structures) which can be reused for different purposes.

Last Updated: Survey of Architecture Frameworks. The specification of architecture frameworks is one area of standardization in ISO/IEC/IEEE 42010:2011 (the international revision of IEEE 1471:2000).. WG42 is collecting examples of architecture frameworks, listed below. Items in grey are entries in progress and should not be considered definitive at this time.
