A soil conditioner is a product which is added to soil to improve the soil’s physical qualities, usually its fertility (ability to provide nutrition for plants) and sometimes its mechanics.In general usage, the term "soil conditioner" is often thought of as a subset of the category soil amendments (or soil improvement, soil condition), which more often is understood to include a wide range ...

Soil conditioner - Wikipedia

Agroforestry is a land use management system in which trees or shrubs are grown around or among crops or pastureland. This intentional combination of agriculture and forestry has varied benefits, including increased biodiversity and reduced erosion. Agroforestry practices have been successful in sub-Saharan Africa and in parts of the United States.

Agroforestry - Wikipedia

Vegetables: Irish potatoes can be planted now.Start with healthy seed pieces purchased from a local nursery or online seed catalog. Continue planting cool-season crops, including broccoli, kale, carrots, and lettuce.
