unmanned machines is a serious one. There are a number of factors involved in leaving a machine tool running with little or no supervision. Last month we reviewed a tool monitoring system to detect tool breakage and avoid machine crashes. Another useful tool for expanding the possibilities of unmanned machining is a fire suppression system.

MACHINING OPERATIONS AND MACHINE TOOLS

A machine is, in a very general sense, a combination of parts we use to over- come a resistance (which is also a force, like a large rock that needs to be removed) by transferring or transforming energy, usually that exerted by a human being.
