Education. The education of structural engineers is usually through a civil engineering bachelor's degree, and often a master's degree specializing in structural engineering. The fundamental core subjects for structural engineering are strength of materials or solid mechanics, Structural Analysis-Static & Dynamic, material science and numerical analysis.

Civil Engineering

Civil engineering design software allows users to draft complex 3D designs of municipal buildings and structures. These tools include those with functionality for railway modeling, road and highway design, and mapping tools—essentially helping with anything pertaining to the city's infrastructure.
