In economics, an externality is the cost or benefit that affects a party who did not choose to incur that cost or benefit. When there is no externality, allocative efficiency is achieved; however, this rarely happens in the free market. [unreliable source?] [better source needed] Economists often urge governments to adopt policies that will "internalize" an externality, so that costs and ...

Relationship to Other Benefits and Costs. In all of the above examples, the benefits flow to parties that depend on transportation facilities and services for their activities. In some cases, the ultimate beneficiary is the business operation that can achieve operating cost savings or greater productivity (output per unit of cost).
