Human Development Report 2016: Human Development for Everyone

Income inequality in the United States is the extent to which income is distributed in an uneven manner among the American population. The inequality has increased significantly since the 1970s after several decades of stability, meaning the share of the nation's income received by higher income households has increased. This trend is evident with income measured both before taxes (market ...

A classification model (classifier or diagnosis) is a mapping of instances between certain classes/groups. The classifier or diagnosis result can be a real value (continuous output), in which case the classifier boundary between classes must be determined by a threshold value (for instance, to determine whether a person has hypertension based on a blood pressure measure).

Receiver operating characteristic - Wikipedia

States are grouped based on the years when they implemented same-sex marriage. Wave 1 is states that implemented same-sex marriage policies before 2013, and Wave 2 is states that implemented same-sex marriage policies in 2013 or 2014.
