dimensions of global environmental change. The journal interprets global environmental change to mean the outcome of processes that are manifest in localities, but with consequences at multiple spatial, temporal and socio-political scales. The journal is interested in articles which have a significant social science component.

Human and Policy Dimensions GLOBAL ENVIRONMENTAL CHANGE

The term "global environment" refers to Earth's environment in general. Many environmental issues primarily affect local and national areas. Others deal with problems that face the entire planet. Many aspects of local ecosystems are self-contained. However, global environmental factors have broad effects on regions across the globe.

What Is the Definition of "global Environment

Description Investigations in Environmental Science, a Case-Based Approach to Environmental Systems is a 3-unit, one-year high school environmental science course that employs a case-based approach to science education. Investigations in Environmental Science is research-based and supported by the National Science Foundation.
