

the global environmental crisis pdf

The 2018 Living Planet report from the World Wildlife Foundation has found that a shocking 60% of the earth's mammals, birds, fish and reptiles have been killed by human activity since 1970.. The findings have led the world's foremost experts to warn that the annihilation of wildlife is now an emergency that threatens all human life on this planet.

THE GLOBAL ENVIRONMENTAL CRISIS - World Future Fund

Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

The World Economic Forum's Risk Response Network. Global Risks 2011, Sixth Edition is a flagship product of the World Economic Forum's new Risk Response Network (RRN).. The RRN is a unique platform for global decision-makers to better understand, manage and respond to complex and interdependent risks.

Global Risks 2011 Sixth Edition

Urgent intervention needed. This is a rapidly growing crisis that is showing no signs of abating. Our warming climate and growing population mean that pressures on land and natural resources are set to increase, which means that without urgent intervention the numbers of deaths we're seeing now will be dwarfed by those in the future.
